Anonymized CV - Python Developer

ABOUT

A Python Developer with 3 years of experience, skilled in Django, Flask, and database management. Recognized for delivering robust software solutions, applying analytical skills, and working efficiently in agile teams. Committed to continuous learning and adhering to best coding practices.

EXPERIENCE

- Demonstrated proficiency in using Python to develop scalable and efficient software applications.
- Experienced in using frameworks such as Django and Flask for web development.
- Hands-on experience with both SQL and NoSQL databases, ensuring secure and optimized data storage.
- Utilized data analysis tools to automate processes and generate insightful reports.
- Worked seamlessly within agile environments, contributing to team objectives and project goals.
- Stayed abreast with the latest industry trends and technologies, continuously improving coding skills and practices.

TECH STACK

- Python
- Django
- Flask
- NoSQL

EMPLOYMENT HISTORY

Python Developer, Property Group Sp. z o.o.

June 2022 - Present

Currently, I am part of an agile team responsible for building dynamic web applications using Flask. I have utilized my strong analytical skills to automate various processes, resulting in improved efficiency. I've also enhanced my experience with NoSQL databases, contributing to our projects' scalability and performance. Continuous learning has been a key aspect of this role, helping me stay updated with the latest tech trends.

Software Developer, Allegro.pl

May 2021 - May 2022

In this role, I leveraged my Python skills to develop and implement robust software applications, primarily using the Django framework. I collaborated with a team of developers to successfully deliver multiple projects on time, while ensuring adherence to best coding practices. Additionally, I took the initiative to optimize our SQL database management, significantly improving the system's performance and security.

EDUCATION

Master of Science in Data Science, AGH University of Science and Technology in Kraków

September 2020 - May 2022

I pursued a specialized master's degree in Data Science to enhance my analytical skills and deepen my understanding of machine learning and AI. The coursework included in-depth study and hands-on experience with data analysis, predictive modeling, and algorithm development. My master's thesis focused on utilizing Python for efficient data processing and predictive analytics.

Bachelor of Science in Computer Science, AGH University of Science and Technology in Kraków

September 2016 - June 2020

During my undergraduate study, I gained a strong foundation in computer science principles and honed my skills in various programming languages, including Python. I successfully completed several projects, where I applied my knowledge of software development and database management.
