

# Junior DevOps Engineer

---

## ABOUT

DevOps Engineer with 2 years of experience in the industry. Proficient in a range of technologies, including Azure, SQL, and Docker, I possess a keen understanding of modern development practices.

## EXPERIENCE

- Demonstrated expertise in building tools to reduce occurrences of errors and improve customer experience.
- Ensured designing procedures for system troubleshooting and maintenance.
- Executed and automated operational processes fast, accurately and securely.

## TECH STACK

- Azure
- DevOps
- Python
- Bash
- Docker
- SQL
- Jenkins

## EMPLOYMENT HISTORY

### Junior DevOps Engineer, Eficode

October 2021 - Present

Currently, as a DevOps Engineer with a powerful and versatile tech stack, I'm responsible for streamlining development and operations processes. I build and maintain robust, scalable, and secure infrastructures, while optimizing application performance.

### Intern DevOps Engineer, Eficode

July 2021 - September 2021

As a DevOps Engineer intern, I was a part of an agile development team building and working on enterprise software applications. I was involved in all areas of system management from environment setup to production deployment.

## EDUCATION

### **Engineering - Computer Science, Lodz University of Technology**

2019 - 2023

This program equipped me with a diverse skills and a strong foundation to tackle complex problems, develop innovative solutions and thrive in the ever-evolving world of technology.
