- Experienced in using frameworks such as React for web development.
- Worked seamlessly within agile environments, contributing to team objectives and project goals.
- Stayed abreast with the latest industry trends and technologies, continuously improving coding skills and practices.

## TECH STACK

- HTML
- CSS
- JavaScript
- Next.js
- TypeScript
- React

## EMPLOYMENT HISTORY

### React Developer, Wolters Kluwer

May 2023 - Present

Currently, I am a Front-End Developer experienced in building dynamic web applications with React. I'm Proficient in React, JavaScript, TypeScript, HTML, and CSS, I ensure high-quality code through testing with Jest and React testing library. I stay updated with the latest tech trends to drive continuous improvement.

### React Developer, Global4Net

June 2021 - February 2023

I'm a member of the team responsible for building a large, e-commerce app. Additionally I maintain and develop an internal CMS application.

### **React Developer, Limango Polska (A member of the Otto Group)**

January 2020 - June 2021

In my position, I utilized my expertise in Next.js, Front-End Development, and a strong command of React, JavaScript, TypeScript, HTML, and CSS to develop and implement robust software applications. Working collaboratively with a team of developers, we successfully delivered multiple projects on time, adhering to best coding practices throughout the development process. Furthermore, I proactively optimized our SQL database management, leading to remarkable improvements in the system's performance and security.

## **EDUCATION**

### **Bachelor of Engineering, Uniwersytet Dolnośląski DSW**

September 2016 - June 2020

During my undergraduate study, I gained a strong foundation in Engineering principles and honed my skills in various programming languages, including JavaScript. I successfully completed several projects, where I applied my knowledge of software development.
