

Junior React Native Developer

ABOUT

A skilled React Native Developer with two years of hands-on experience, adept at creating cross-platform mobile applications that offer seamless user experiences. Proficient in leveraging React Native's capabilities to develop and maintain high-performance applications for both iOS and Android platforms.

EXPERIENCE

- Well-versed in collaborating with multidisciplinary teams, implementing responsive designs, and optimizing app performance for diverse client needs.
- Proactively identified and resolved performance bottlenecks, significantly improving app responsiveness and load times, which led to enhanced user satisfaction and engagement.
- Skillfully integrated third-party APIs and services into applications, expanding functionality and enriching user experiences with features.
- Actively kept up-to-date with the latest React Native developments and best practices, actively seeking opportunities to expand skill sets and explore emerging technologies in the mobile app development landscape.

TECH STACK

- TypeScript
- JavaScript
- React
- HTML
- CSS
- SASS
- Express.js
- MongoDB
- React Native
- Redux
- jQuery

EMPLOYMENT HISTORY

React Native Developer, FamGenix

December 2021 – Present

My current role involves leveraging my expertise in TypeScript, Expo, JavaScript, React Native, and Redux to craft seamless and engaging mobile applications. I

contribute to the entire development lifecycle, from conceptualization to deployment, while ensuring optimal user experiences across diverse platforms. By harnessing these technologies, I efficiently bridge the gap between web and mobile, delivering high-quality, cross-platform solutions that meet user needs and drive business success.

EDUCATION

Master of Science in Computer Science, Wrocław University of Applied Informatics

September 2021 - September 2023

During my Master of Science in Computer Science program, I gained a comprehensive understanding of advanced concepts and practical skills in various areas of computer science. Engaging in rigorous coursework and hands-on projects, I honed my expertise in algorithms, data structures, software engineering, and machine learning.

Engineer, Electronics, Wrocław University of Applied Informatics

2017 - 2021

I have a comprehensive academic background in Electronics Engineering, enriched by a specialized focus on the practical applications of Computer Engineering within technology. Through my university program, I gained hands-on experience in designing and implementing innovative solutions that bridge the gap between hardware and software.
