

# Cybersecurity Expert

## About

---

I'm a Cloud & DevOps Specialist with experience in delivering AWS-based projects and implementing DevOps processes in large enterprises. My professional focus is on Cloud and automation in modern, resilient architectures.

## Career Summary

---

### **Cloud & Security Consultant**, Accenture

Jul 2018 - present

I joined Accenture as a Cybersecurity consultant to work on projects for international enterprises, among others:

- Cloud Architecture design & implementation for a software company
- SecDevOps implementation for international FMCG company
- GDPR implementation at international telco

### **Cybersecurity Specialist**, Immusec

Feb 2018 - Jul 2018

My work at Immusec is focused on implementing Cybersecurity solutions and systems (WAF, DLP, Firewalls, SIEM), as well as designing and overseeing development of a managed security system.

### **Cybersecurity Analyst**, EVO Payments

Sep 2017 - Feb 2018

I started working in EVO Payments Security Operation Center as an Analyst designated to work on SIEM systems and investigate incidents coming from DLP, WAF, and Endpoint Protection systems.

### **Backend Developer**, Divante

Oct 2016 - Sep 2017

I joined Divante to work on commercial, large-scale eCommerce systems.

- Developing backend for eCommerce solutions based on Magento 2.1
- Front-end adjustments using LESS and Magento 2 templates system
- Integration with external services and APIs - Application security testing
