

Data Lake Developer

Summary

Being an AWS cloud and big data consultant for 3 years, I have followed many trainings on the AWS cloud which allowed me to be certified three times as an AWS developer and architect and to bring satisfaction to my clients on the projects on which I intervened. I would be very happy to support you in your digital transformation to the AWS cloud by working on the following points:

- Construction of robust Big Data pipelines: Spark, Python, SQL ...
- Migration to the AWS cloud
- AWS architecture
- Implementation of best practices (security, cost optimization, high availability, redundancy, storage ...)
- Automatic deployment (CI/CD)
- Automatic tests
