On a mission to build great mobile products

Summary:

Mobile phones are remote controls of our society. We have to do them right.
I will help you improve and stabilize the technologies and processes in your team.

I am the guy who always seeks development in new areas, but also the guy that knows how to make things happen. I believe in responsibility and ownership. Always put the user first - both the final user of the app and the future developer of code.
I have almost 10 years of commercial experience, during which I have worked with startups and large corporations as a programmer, team leader and IT manager.
I have experience in building products, from basic concepts, through the sales process, up to implementation and maintenance.
Looking for a place where my skills will allow people and the company to rise.

Last experience:

02.2021 - now   **HSBC – Mobile Tech Lead**

Leading the cross-functional team that is responsible for the transformation of old, hybrid apps into new, native architecture. Designing and building modules that can be reusable between apps. Governance on security and maintainability of the solution. Analysis of the usage of new technologies.

02.2020 - 02.2021   **Smartpatient – Senior Android Developer**

Developing **MyTherapy** - award-winning pill reminder and medication tracker.
Rated 4,7 on Google Play, over 1 million installations.
Worked as a developer in a self-organized SCRUM team.
Implemented app module as a fully-fledged medical device. I worked on security improvements and audits, BLE communication, modularization of the app.

01.2018 - 02.2020   **Neontri (formerly Braintri) – IT manager / Android Architect**

Product owner of **Mobile Banking Framework**: Toolbox for building secure Android, iOS and Hybrid mobile apps with associated backend components.
Building a roadmap, leading development and deployment.

Managed the development of a mobile app for the startup bank - **Aion.** Android and iOS apps from scratch up to pilot release in less than 10 months.

Designed and managed the development of **Apiffee** - solution to generate Android and iOS apps directly from websites.

Designed security architecture of **Pekao's** internal app for employees.

Developed top banking and financial apps as manager and architect with teams up to 15 people.
Worked on apps for such companies as **PKO BP, mBank, Pekao**.
One of them - **IKO** was chosen by "Retail Banker" as nr 1 banking app in the world

01.2017 - now   **The Code Side – Mobile Development Consultant**

Help software companies with all aspects around the mobile:

- architecture of apps
- stabilization of the technologies and processes
- security and audits
- training teams
- managing teams
- build mobile-oriented products
- building mobile teams

01.2017 - 12.2017   **Future Mind – Team Leader / Android Developer**

Worked on all kinds of apps with a huge amount of legacy code but also build greenfield projects from scratch; Lead teams up to 4 people;
Some apps that I have worked with:
Virgin Mobile, Qpoint, Demotywatory, Omili

08.2014 - 12.2016   **SafeKiddo - Senior Software Developer**

Worked as a software architect, project manager, lead developer in a startup environment.
Parental control app with access and time management, safe browser and
launcher, autologin, auto-update, ROM embedded app on LG tablets;

Some other companies that I worked with:

Telemedi.co - Android Consultant
Mobica - Android Developer
LimeCode - Adobe Flex Developer

Education:

2009 - 2014   B.Sc   Faculty of Electronics and Information Technology
                              Computer Engineering
BallCollector - mobile robot operating in a sports hall and collecting ping-pong balls; C++, ROS, vim, Redmine, OpenCV

Technologies:
- Most used: Kotlin (fanboy), Java
- Other: SQL, Groovy, C++, XML, Dart
- Favorite tools: Dagger, Koin, RxJava, Coroutines, Kotlin Multiplatform, Retrofit, Moshi, Room, Mockito, MockK, JUnit5, Kotest, Espresso, Glide, Lottie, Timber, Firebase, Crashlytics, MVVM pattern

Other:
