

## Profile

With over a decade of software testing experience across diverse industries, my career goal is to continue leveraging my expertise to drive excellence in software quality assurance.

I aim to collaborate with dynamic teams, applying my skills to deliver comprehensive testing solutions tailored to each project's unique requirements. By staying at the forefront of industry trends and technologies, I aspire to contribute significantly to the success of software development initiatives while continuously advancing my professional growth.

## Work Experience

01/2023 – 03/2024 BARCELONA, CATALONIA, SPAIN

### Lead QA Automation Engineer Payflow (YC S21)

- Contributed to the team in guaranteeing the quality of Payflow's three products: Payflow Mobile UI app, Dashboard Web UI app, and Public API.
- Actively participated in the agile development team's manual test load during sprints.
- Developed a Test Automation Project for the Payflow Mobile UI app, using Webdriver IO and The Cucumber with Node.js/TypeScript. Automated tests were operated on BrowserStack and were compatible with both iOS and Android platforms.
- Actualized Test Automation Project for the web app, which will employ the Selenium-js NPM package and The Cucumber.

03/2022 – 01/2023 BARCELONA, CATALONIA, SPAIN

### QA Automation Engineer HUBUC

- Successfully resolved all issues in an outdated Golang-based test automation project as part of my role as a QA Automation Engineer
- Spearheaded the development of a new test automation project using Java, resulting in a regression suite that is now running periodically on Jenkins with a custom job

## Work Experience

- Followed through plans to integrate the smoke suite into the CI pipeline in the near future
- Defined and implemented a sanity test suite for developers to run on their local environments, amending overall testing efficiency
- Took charge of streamlining all test processes while concurrently expanding test automation coverage and maintaining the existing test automation project
- Developed two additional projects (modules), including one that generates test data for the Front-End team's new environments

09/2020 – 02/2022 ISTANBUL, TURKEY

### Senior Test Solutions Consultant Testinium

- Assumed the role of Senior QA Engineer at the International Bank of Azerbaijan as a Testinium employee
- Placed and addressed automation needs to expedite testing processes
- Developed a comprehensive test automation framework Selenium for a BDD project, enabling seamless mobile, GUI, and API testing
- Created a user-friendly interface within the framework, allowing non-coders to effortlessly generate new test cases
- Mentored and trained junior and mid-level quality assurance team members to heighten their self-sufficiency and proficiency in acquitting automation tests.

06/2018 – 09/2020 ISTANBUL, TURKEY

### Software Quality Assurance Team Lead Apsiyon

- Led and managed a Test Team at Apsiyon for a duration of 3 years, overseeing the implementation of effective software testing processes.

## Work Experience

- Pioneered the establishment of the software testing department at Apsiyon, becoming the first employee dedicated to this area.
- Successfully built and trained a proficient test team, enabling them to effectively maintain automation projects for API services, GUI, and Mobile platforms.
- Restructured existing software testing processes, enhancing efficiency and quality throughout the organization.
- Spearheaded the development of software test automation projects from scratch, securing comprehensive coverage and improving overall testing capabilities.

09/2017 – 04/2018 ISTANBUL, TURKEY

### **Senior Software Test Engineer** **Paytrek - Seamless Transactions**

- Revamped and optimized test processes, enhancing efficiency and effectiveness
- Spearheaded the reconstruction of a test automation project, leveraging Selenium WebDriver for API and UI testing
- Prepared comprehensive test case scenarios for rigorous functional testing
- Performed functional test scenarios and meticulously documented and reported test results
- Utilized Jira for issue reporting, tracking, and coordinated retesting after bug fixing
- Behaved regular regression testing using Jenkins to insure code stability prior to publishing

01/2017 – 08/2017 TUZLA

### **Software Test Engineer** **Trendyol Group**

- Developed comprehensive test case scenarios for functional testing, guaranteeing effective collaboration with developers
- Executed rigorous functional test scenarios and meticulously documented the results for accurate analysis and reporting
- Proficiently reported and tracked issues established on meticulous test results using Jira, promoting efficient bug fixing and resolution
- Dealt thorough retesting of identified issues after bug fixing, assuring the attainment of optimal software quality
- Performed efficient maintenance testing after live deployment to ascertain the ongoing reliability and functionality of the software

## Work Experience

- Successfully automated test cases using Selenium WebDriver, enhancing testing efficiency and overall productivity.

11/2014 – 12/2016

### **Software Test Engineer** **Bimsa Uluslararası İş, Bilgi ve Yönetim Sistemleri**

- Conducted static tests on test bases during the initial phase of teknosa.com projects
- Prepared test case scenarios for functional testing and shared them with developers
- Performed smoke testing after running test cases to guarantee system stability
- Ran functional test scenarios and generated comprehensive reports on the results
- Reported issues based on test results using Jira and actively tracked and retested those issues after bug fixing
- Supported user acceptance testing (UAT) and supplied valuable data to product teams for UAT analysis
- Conducted regression testing following UAT completion and live release to secure system integrity
- Performed maintenance testing post live deployment to identify and rectify any potential issues
- Automated test cases using Selenium WebDriver for improved efficiency and accuracy.

03/2013 – 11/2014 ÜMRANIYE

### **Software Testing and Quality Specialist** **Sigortam.Net**

- Conducted thorough analysis and executed rigorous testing procedures to ensure quality control and user acceptance of software products, while adhering to functional requirements.
- Monitored and controlled the usability of the product based on business requirements and technical analysis.
- Produced and implemented comprehensive test plans, letting in functional, integration, user acceptance, performance, and other testing approaches.
- Documented detailed test result reports providing clear insights on software performance and identify areas for improvement.

## Work Experience

- Oversaw test coverage to ensure maximum efficiency and effectiveness in detecting potential issues.
- Utilized automation tools such as Selenium IDE to create automated test scripts, streamlining the testing process and improving overall productivity.
- Provided exceptional support to users by promptly resolving incidents and effectively addressing their needs

10/2011 – 03/2013 ATAŞEHİR

### **Software Testing and Quality Specialist SET YAZILIM**

- Formulated and documented comprehensive test scenarios, aligned with analysis documents, to ensure effective functional testing and accurately report results
- Plied expert support and guidance to customers during User Acceptance Testing (UAT) phase, ensuring smooth execution and optimal product performance
- Prepared and delivered impressive customer demos, presentations, and user manuals, showcasing the software's features and benefits
- Conscientiously conducted and meticulously documented test runs, maintaining a meticulous record of findings and observations

## Skills

### – AUTMATION TOOLS

Selenium	Native
Appium	Full
Postman	Full
WebdriverIO	Full
Jmeter	Full
K6	Professional

### – SOFTWARE DEVELOPMENT LANGUAGES

Java	Native
TypeScript	Full
JavaScript	Full
.Net	Professional
Python	Limited

## Education

01/2008 – 01/2010

### **Faculty of business | 2,92 Anadolu University**

01/2001 – 01/2004

### **Foreign Trade | 2,75 Kocaeli University**

## Languages

English	Professional
Turkish	Native
Spanish	Limited

## Certificates

01/2023

### **EF SET English Certificate 64/100 (C1 Advance) EF Standard English Test (EF SET)**

11/2015

### **International Test Automation Certificate Keytorc Software Testing Services**

05/2015

### **ISQTB Foundation Level ISTQB® - International Software Testing Qualifications Board**

03/2024

### **Professional Scrum Developer I www.scrum.org**

## Strengths

Automation Tools Proficiency

Scripting Skills

Analytical Thinking

Agile Methodologies

Continuous Learning
