

## PROFESSIONAL EXPERIENCE

---

### **QA Engineer, Intive 01.02.2016-30.04.2024**

#### **QA Engineer, Remote, The Weather Group, 01.08.2020-31.12.2023**

The project for this client consisted of 3 stages. The first project, titled "Phoenix", involved creating an application using YouiEngine. Here, testing took place on multiple devices such as Roku, AppleTV, FireTV, Android & iOS, AppleTV. Then, the next project involved removing YouiEngine and rewriting the application from scratch using BrightScript - here, testing was only on the Roku platform from my side. The second stage was successful, and the client wanted to continue working with my team in the next stage. The third stage is the continuation of work on the rewritten application, plus TWC application - again only on Roku.

- Manual testing of application on phones and tablets (Android and IOS), Roku, AmazonTV, FireTV, AppleTV, Tizen
- Writing test cases (TestRail)
- Reporting bugs (JIRA), verifying bug fixes
- Mocking responses using mitmproxy
- Collaboration with devs, QAs, UI/UX, PM
- Team was split across the world
- Scrum, Kanban based project

#### **QA Engineer, Wrocław/Poznań, BlackBerry Corporation, 01.04.2019-01.06.2020**

- Manual testing of mobile app (Android), reporting bugs (JIRA), verifying bug fixes
- Writing and reviewing test plans and test cases (TestRail)
- Collaboration with devs, QAs, PM
- Team was split into two locations: Wrocław and Poznań
- Scrum based project
