

Senior ETL Developer at BEC Financial Technologies
Warsaw, Mazowieckie, Poland

Summary

A Detail-oriented, methodical aspirant having a great experience in Business Intelligence area. I possess a great knowledge of OLAP and OLTP processes. Creating SSIS packages and ETL mappings in Informatica have been my daily tasks. My familiarity with Data Vault makes me a good database architect. Reporting in Qlikview, Power BI and SharePoint makes me a good data representer. Bringing strong background in planning and monitoring high budget projects, eliciting project requirements and transforming business into IT. I have a great experience of software development and it has enhanced my skills in the world of IT. Working in team of people of different nationalities and skills has delivered me an opportunity to connect and work with people of different mentalities and working style. I have an immense experience of solving different kind of problems which I faced while working in IT field.
