TPM lead, Google Gemini

Greater Seattle Area

Summary

I"m a tech entrepreneur working on applied ML problems.

Experience

Google

2 years 2 months

Staff Technical Program Manager, Google Gemini AI
January 2024 - Present (6 months)
Seattle, Washington, United States

Driving infrastructure, platform and new feature development to advance Google Gemini's generative AI ambitions and benefit users around the world.

TPM Leadership, Google Search Ads
May 2022 - January 2024 (1 year 9 months)
Seattle, Washington, United States

Google Search Ads Quality team are building a best-in-class infrastructure for Search Ads to operate and innovate at scale, with AdsML focused on inventing and supporting planet-scale ML capabilities to enrich every user's experience with useful ads, deliver industry-leading advertiser value, and drive Google's growth.

Amazon

4 years 8 months

Senior Manager TPM - Alexa AI
October 2019 - May 2022 (2 years 8 months)
Seattle, Washington, United States

Principal Technical Program Manager - Alexa for PC
October 2017 - October 2019 (2 years 1 month)
Seattle, Washington, United States

World Mentor

Board of Directors
December 2009 - December 2019 (10 years 1 month)

World Mentor is a non-profit that connects young people with volunteer business mentors around the world to inspire personal and career development, as well as expand their global opportunities and positively influence a future generation of leaders.

TranscribeMe
Head of IT Department
July 2010 - September 2017 (7 years 3 months)

TranscribeMe delivers high accuracy automated and human validated speech recognition services to enterprise and consumer customers with an award winning combination of speech recognition technology and crowd-based global transcriptionists.

The Boston Consulting Group
Summer Consultant
May 2008 - July 2008 (3 months)

BCG is a top-tier global strategy consulting company working on improving organizational performance through analysis of existing business problems and development of strategic change plans.

I worked on a team developing customer churn reduction strategy for the business division of a major telco, and assessing market sizing and positioning for a hardware networking vendor.

St John Ambulance
Lead Web Application Developer
September 2003 - May 2005 (1 year 9 months)

I designed and developed the National Events Management System, an award-winning web-based enterprise application created to coordinate all ambulance events-related activities throughout New Zealand. The system is used by 10,000+ volunteers and paid ambulance staff nationwide.

My work involved designing the technical architecture of the system and fully implementing the software in Microsoft ASP.NET and SQL Server, as well as managing the system integration with the core St John enterprise architecture.
