JavaScript	Experienced
MySQL	Expert
PostgreSQL	Experienced
MongoDB	Experienced
Redis	Experienced
PHPUnit	Expert

EXPERIENCE

February 2021 - Present

Senior PHP Developer

NexTek / Rönninge, Sweden 144 44

- Optimized large-scale platform using MySQL Cluster and Galera, achieving a remarkable 40% reduction in query response time and enhancing overall system efficiency.

- Implemented Laravel Horizon with Redis for seamless background job queue management and real-time monitoring, resulting in a 30% improvement in job processing times.

- Actively involved in code reviews and provided valuable feedback for continuous improvement, ensuring high code quality and best practices across the development team.

- Collaborated with cross-functional teams to design and implement CI/CD pipelines using GitLab CI/CD, ensuring automated testing and deployment processes.

- Mentored junior developers, conducting code reviews and providing technical guidance to promote best practices and maintain high code quality standards.

April 2018 - December 2020

Senior PHP Developer

Codepole / Stockholm, Sweden 113 28

- Spearheaded the development of a microservices architecture using PHP and Laravel, enhancing scalability and performance across multiple projects.

- Utilized Elasticsearch's robust search capabilities to enable complex and fast text-based searches across large datasets, boosting search performance by 50%.

- Implemented Sentry for error monitoring and logging, effectively identifying and addressing issues in the application to ensure high reliability and improved user satisfaction.

- Introduced automated testing using PHPUnit and Selenium WebDriver, reducing manual testing efforts by 40% and enhancing test coverage and reliability.

October 2015 - March 2018

PHP Developer

Kogifi / Wrocaw, Poland 54-203

- Contributed to project planning and requirement analysis, aiding in the successful execution of various projects with a total budget of up to 2 million dollars.

- Developed and implemented a caching strategy using Redis, resulting in a 25% reduction in page load times and delivering a smoother user experience during high traffic periods.

- Assisted in creating technical documentation, including API documentation using Swagger, to ensure clear and accurate representation of endpoints, request/response structures, and authentication methods, enhancing knowledge sharing and project maintainability.

-

Optimized database schema and queries implemented appropriate indexes and query optimizations to enhance database performance and reduce query execution times.

February 2015 - October 2015

Intern

Kogifi / Wrocaw, Poland 54-203

- Spearheaded the migration of legacy code to the latest version of Laravel, modernizing the application architecture and improving maintainability.

- Participated in Agile development methodologies, attending daily stand-ups and sprint planning meetings to contribute to project progress and team coordination.

- Collaborated with senior developers to develop RESTful APIs using Laravel, contributing to the enhancement of backend functionality and data retrieval processes.

EDUCATION

2010 - 2014

Bachelor of Science (BS)

Chalmers University of Technology
