

Technical Team Lead | Senior Oracle Consultant | Solution Architect

Summary

I am an experienced and responsible person looking for ongoing learning, new challenges and professional growth. My experience is based on cooperation with many different businesses and companies, mainly from the Banking and FinTech sector. Currently, I support and provide IT solutions for companies dealing with financial software for leasing, lending and asset financing companies.

My expertise in Oracle technologies ensures that each solution is tailored to meet unique needs, combining efficiency and scalability to deliver outstanding results for projects. I have 10 years of experience with SQL, PL/SQL and a few years with database performance optimizations. I am engage in troubleshooting day to day database related problems, work closely with the IT Infrastructure and development teams and provide advice and recommendations around software solutions.

Work History

2019-03
- present
