- Developing and maintaining responsive websites using Webflow and front-end technologies
- Writing clean, organized, and documented code that adheres to industry standards
- Collaborating with design and development teams to ensure website functionality and design are aligned Integrating third-party services and tools such as Integromat, MailChimp, and Airtable into websites
- Testing and troubleshooting website functionality across multiple devices and browsers
- Optimizing website performance and implementing SEO best practices

- Communicating project progress and providing status updates to clients and project managers.

Webflow Developer / Front End Developer at *PINKMAN*
August 2021 - February 2022

I collaborated with the design and development teams to ensure the website met the client's requirements and was optimized for user experience. I conducted quality assurance testing, ensured the website's responsiveness across devices, and optimized website speed and performance. I also stayed up-to-date with the latest front-end development trends and best practices, communicated progress with the team, and met project deadlines.

Professional development
September 2020 - July 2021

As someone on a career break, my responsibility is to prioritize my own professional development during this time. This includes:

- Identifying areas of growth and skill-building that align with my career goals
- Seeking out relevant learning opportunities, such as online courses, workshops, or industry events
- Networking with professionals in my field to stay connected and informed about industry trends and best practices Reflecting on my career trajectory and making strategic decisions about my next steps
- Maintaining a positive and proactive attitude towards my career development, even during a break period.

Junior Frontend Developer at *Brights*
January 2023 - August 2020, Ukraine

As a Junior Frontend Developer at Brights, I was responsible for developing and maintaining web applications using various programming languages such as HTML, CSS, and JavaScript. I worked closely with the team, implementing designs

into functional web pages, ensuring compatibility, debugging, and conducting testing. I also stayed up-to-date with the latest web development technologies and trends, communicated progress to the project manager, and maintained high-quality code that is scalable, efficient, and maintainable.
