WEBFLOW DEVELOPER

HELLO!

I have been designing web products for many years. My career path began over 20 years ago with web development in Adobe Dreamweaver. The next few years I devoted to graphic design. After a few years, I switched to the well-known and highly regarded WordPress. Eventually I discovered, in my opinion, the best platform for designing websites and stores - Webflow.
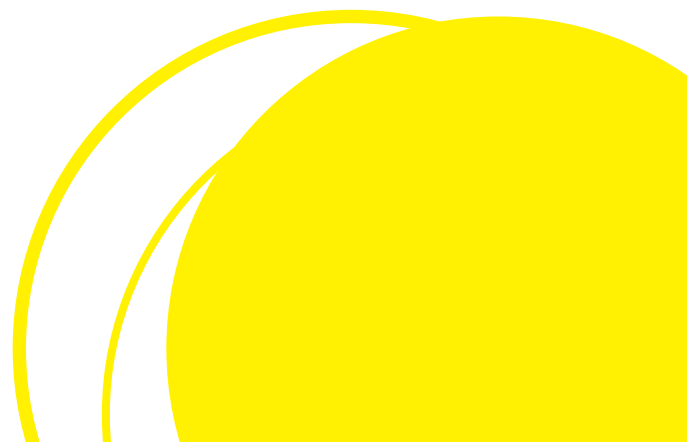

As a Webflow developer, I worked with a team of talented and innovative professionals to deliver high-quality, custom web solutions for a variety of clients and industries.

Experience:

Webflow, Figma, Zapier, Airtable, Attlasian, JIRA, TRELLO, Front-End Development, HTML, HTML5, CSS3 and JavaScript skills.
Strong knowledge of technical seo: Core Web Vitals - Optimize FID, CLS & LCP.

Tools:

Webflow, VS CODE, Finsweet, Client-First, Attributes, Figma and Adobe Creative (Photoshop, Illustrator, XD, InDesign), Zoom, Slack, Meet
