

## 📁 Employment History

### Network Operations Center Engineer at Multi-Telekom, Pawłowice, Poland

August 2021 — Present

Managing carrier network, setting up monitoring systems using Grafana, InfluxDB, Prometheus, LibreNMS, coordinating field engineers, managing virtualized systems based on Debian and Ubuntu, creating internal systems for managing customers access and billing, creating internal system for employee work reporting, creating Building Management System for datacenter, managing MySQL databases.

Stack: Debian, Ubuntu, XCP-NG, Grafana, InfluxDB, MySQL, MariaDB, Node.js, Ansible

### Linux System Administrator / Node.js developer (freelancing) at Houseware, Katowice, Poland

March 2021 — Present

Managing customers' networks, Windows systems and Debian, RedHat, Windows Server systems, managing virtualized environments based on VMWare ESXi, Proxmox VE, Microsoft Hyper-V, XCP-NG, actively monitoring customers' environments for security events and profiling infrastructure for future improvements, creating internal systems using Node.js.

Stack: Debian, Ubuntu, RedHat, Windows Server, VMWare ESXi, Proxmox VE, Microsoft Hyper-V, XCP-NG, Grafana, InfluxDB, MySQL, MariaDB, Node.js, Ansible, Redis, MongoDB, MSSQL

### DevOps Engineer (contract) at DreamProject, Warsaw, Poland

August 2020 — Present

Preparing development environments for developers, maintaining network services, administering servers with Proxmox VE-based virtualization, database profiling configuration and preparing environment for profiling infrastructure, creating network infrastructure based on VyOS and Mikrotik, coordinating security operations inside infrastructure, Terraform for managing cloud infrastructure.

Stack: Grafana, Proxmox VE, Docker, Docker Compose, Debian, environments using PHP 7.4/8.1, Node.js, Redis, CircleCI, Jenkins, Github Actions, AWS, Ansible, Terraform, SonarQube, NGINX.

### DevOps Engineer (contract) at SimPay / Payments Solutions sp. z o.o., Warsaw, Poland

August 2020 — Present

Preparing development environments for developers, creating microservices architecture for financial sector, managing RBAC for developers, setting up CI/CD process for microservices, network

## Skills

Kubernetes

Docker

Ansible

Terraform

GCP

AWS

JavaScript Development

Java Development

Backend Development  
(Node.js)

Linux System Administration

Network Administration

## Languages

Polish

English (B2)

infrastructure continuous hardening, creating Elasticsearch stack, monitoring system access / applications logs using Kibana and Logstash.

Stack: Grafana, Proxmox VE, Docker, Docker Compose, Debian, environments using PHP 7.4/8.1, Node.js, Redis, Jenkins, Github Actions, AWS, Ansible, Terraform, SonarQube, NGINX.

### **Linux System Administrator at DX-IT, Radom, Polska**

May 2019 — March 2021

Preparing network infrastructure for video games sector, actively profiling network and system resources, optimization of network routes, managing multiple servers for gaming solutions, creating automation Ansible playbooks for faster deployment.

Stack: Debian, Ubuntu, RHEL, CentOS, RedHat, Proxmox VE, LXD, Cockpit, Red Hat Insights, LibreNMS, Grafana, InfluxDB, Prometheus, MongoDB, MariaDB, netdata, Ansible, NGINX

### **Linux System Engineer / Network Engineer at PALLOX Paweł Chwastek, Skoczów, Poland**

December 2016 — August 2020

Managing carrier network, setting up monitoring systems using Grafana, InfluxDB, Prometheus, LibreNMS, monitoring access logs using Logstash and Kibana, managing security operations and network hardening, managing systems with Proxmox VE-based virtualization, managing XCP-NG servers, creating internal systems for customer billing, creating automation scripts for managing network, managing databases based on MariaDB and MongoDB, managing Cisco switches, MikroTik routers, Ubiquiti antennas.

Stack: Grafana, Proxmox VE, XCP-NG, ELK, InfluxDB, Docker, Docker Compose, Debian, Node.js, Redis, Jenkins, Ansible, MariaDB, MongoDB, Cisco, RouterOS, Ubiquiti AirOS, NGINX

## **🏢 Internships**

### **Linux System Administrator at Raw-Space UK, Bristol**

May 2019 — May 2019

Managing virtual servers based on Debian, CentOS, Ubuntu, preparing CI/CD stack and environments for developers, managing NGINX web servers, setting up monitoring systems using Grafana, InfluxDB, Prometheus, LibreNMS, monitoring access logs using Logstash and Kibana, managing security operations and network hardening.

Stack: Debian, CentOS, Ubuntu, CircleCI, Jenkins, Grafana, InfluxDB, Elasticsearch, Logstash, Kibana, LibreNMS, NGINX.

## **🎓 Education**

### **IT Technician, Zespół Szkół im. Władysława Szybińskiego w Cieszynie, Cieszyn, Poland**

September 2016 — March 2020

## ✦ Extra-curricular activities

**System Administrator at Parafia Ewangelicko-Augsburska w Skoczowie, Skoczów, Poland**

January 2018 — Present

**Web Developer at Zespół Szkół nr 3 w Skoczowie, Skoczów, Poland**

September 2015 — June 2016

Creating school website using Angular 2, Node.js.
