DevOps Engineer

05/2020 - Present

DevOps Engineer

Santander Bank Polska

Maintenance of containerization services (Openshift clusters, ArgoCD, Sysdig). Development and maintenance of CI/CD pipelines for core banking services running on Openshift. Development of internal software used for creating virtual machines filling strict banking security requirements (Jenkins, Ruby, Terraform, Packer, VMware).
Configuration management of bare-metal and virtual machines (Opscode Chef). Development of software supporting internal automation processes.

Cloud Linux Administrator

09/2019 - 05/2020

Microstrategy

Maintenance of AWS infrastructure for Microstrategy Cloud, monitoring and supporting internal Application team support.

Linux Administrator & Prestashop Developer

01/2016 - 08/2019

Self-employment

Setting up dedicated servers for e-commerce stores based on Prestashop engine. Integration of Prestashop stores with various sales systems, creating custom modules.

Linux Administrator

01/2015 - 12/2015

Craftures.com

Craftures was side project of Craftserve. It was the service which made possible to create instant, ephemeral Minecraft instances with ready to play games in Minecraft (adventure, platformer games etc) - very popular at that time. My duties: web stack administration, software stack deployment with Ansible. Single Minecraft servers were run on AWS EC2 instances.

Linux Administrator

05/2011 - 12/2015

Craftserve.com

Web stack administration, service isolation and virtualization. Automation of dedicated servers setup with SaltStack. Configuration of TProxy (transparent proxy) which allowed customers to connect to Minecraft instances using only domain names (without port number). This also gave possibility to hibernate Minecraft instances and to wake them up on demand when there was new connection from customer. Due to this solution company was able to cut the
■ costs by over 50%.
Skills

OpenShift / Kubernetes

AWS Cloud

Terraform

Jenkins

Gitlab & gitlab-ci

Implementation and development of CI/CD process
Hashicorp Vault

Hashicorp Consul
Languages

english

polish

Hobbies

■ Automotive mechanics and electronics

■ Strength sports (powerlifting)

Known technologies

Openshift, Kubernetes, Sysdig, Terraform, Docker, Jenkins, ArgoCD, Helm Charts, Git, Gitlab, VMware, Proxmox, Opscode Chef, Hashicorp Vault, Hashicorp Consul, Hashicorp Packer, SolarWinds IPAM, Active Directory, Zabbix, Apache Web Server, nginx, MySQL, iptables, NFS, postfix, PowerDNS, Python
