Product Developer w Flexhouse

Warsaw, Mazowieckie, Poland

## Summary

With a diverse background in the design industry, I bring a unique blend of creativity, analytical thinking, and a deep understanding of processes that bridge technical and creative aspects, ensuring outcomes that meet both business and customer needs. I am open-minded and detail-oriented, a communicative team player - not a rockstar.

---

## Experience

Flexhouse

Product Developer

January 2021 - Present (3 years 8 months)

Warszawa, Woj. Mazowieckie, Polska

- Working with international, multidisciplinary teams on developing furniture and various design objects to be produced in scalable series.
- Responsible for project management and development process coordination.
- Leading communication with customers and producers to ensure design solutions meet business and technical requirements.
- Gathering technical analysis of the product constraints and researching solutions to apply before launching serial production, reporting development progress and creating product documentation.
- Responsible for assembly instructions for end customers - from research on assembly process optimization by use of innovative constructions and fittings, through designing the unboxing experience and assembly scenarios, to creating intuitive instructions, combining visuals and texts.

mycs GmbH

Product Manager

January 2015 - December 2020 (6 years)

- Collaborating with cross-functional teams launching new product lines, designing new features in company's online furniture configurators.
- Documenting and explaining furniture's technical properties in Confluence adjusted to specific needs of IT, CS and Product QA departments.

- Creating assembly instructions for furniture lines - from designing the content to designing layouts and keeping them up to date.
- Orchestrating automated manual implementation - a feature processing a bespoke customer-created furniture into automatically generated assembly instruction booklet or printable PDF.

## Hem.com

### Production Automation Manager

January 2013 - December 2014 (2 years)

Warsaw, Masovian District, Poland

- Working on the transition toward automated furniture production - managing the creation of an application that turned online orders of customized shelving system into hand-off data, ready for furniture production using advanced machine park.
- Gathering and documenting furniture construction constraints for software engineers.
- Implementation of automated furniture production in multiple factories. Further development of the app, designing new features that improved communication between company department (Sales, QA, Delivery) and the customers.
- Managing a team of CAD drafters delivering customized furniture designs.

## ARTO associés

### Space Planner / Interior Designer

May 2012 - October 2012 (6 months)

- Analyzing customers' needs and objectives to achieve an optimal office layout.
- Drafting plans, 3D modelling, creating 3D renderings and graphic presentations.

## MAJENCIA

### Interior Designer

May 2009 - May 2012 (3 years 1 month)

- Working for the biggest office furniture manufacturer in France.
- Supporting Marketing and Sales department with visuals and descriptions of customized products.
- Implementing multiple communication support templates and creating shared 3D model libraries.

## Dragon Rouge

### Retail Space Planner

August 2008 - April 2009 (9 months)

- Designing retail spaces (interiors and elevations), following brand identity rules and shop owners' custom requirements.

### Carré Noir

Drafter

July 2008 - August 2008 (2 months)

- Designing shop fronts for big surface stores: composing layouts out of a library of visual components, following brand guidelines
