CURRICULUM VITAE

Occupational Experience	
Employer	DXC / Hewlett Packard Enterprise
Position	Senior Architect Programmer (JAVA) / Role: Lead Java Developer, Java Architect
Period	09.2018 – till now
Vocational Duties	 developing Java web application,
	 technical leading of international Java developers team, designing technical solution, reporting risks and proposing solutions, communicating with other teams,
	 participating architectural meetings, proposing solutions for application improvements,
	 setting up source code quality metrics, organizing brain storms, reviewing source code,
	 creating geospatial functions for data corrections,
Exemplary projects	 Microservices for supervision of car manufacturing in factory
Position	Programmer (JAVA) / Role: Lead Java Developer, Java Architect
Period	09.2015 – 08.2018
Vocational Duties	 developing Java web/CLI application,
	 leading team of 3 Java developers, planning work in scrum iterations, moderating stand- uppediapetebling teaks, congrting risks, communicating with other teams, proposing
	ups, dispatching tasks, reporting risks, communicating with other teams, proposing solutions to technical and organizational problems, setting up source code quality metrics,
	organizing brain storms,
	 participating architectural meetings, proposing solutions for application improvements,
	 creating technical design for application,
Exemplary projects	 Identification and verification in banking application,
Employer	Samsung
Position	Senior Software Engineer (Java) / Role: Java programmer, Project Leader
Period	09.2013 – 08.2015
Vocational Duties	 designing and developing web services, command line applications and distributed applications,
	 establishing and running applications in Amazon Cloud,
	 advising developers with lower roles and sharing knowledge,
	 leading team of 4 people - reporting possible risks, taking responsibility for delivering on
	time, leading correct technical path of tasks realization, dispatching tasks between team
	members,communication inside international team and between international teams,
Exemplary projects	 Samsung Cloud Print

Employer	TomTom
Position	Senior Software Engineer (JAVA)
Period	 10.2009 – 08.2013 working according to agile methodology,
Vocational Duties	 advising developers with lower roles and sharing knowledge,
	 reporting possible risks of tasks realization, guarding the time and correct path of tasks
	realization,
	 designing and developing applications that process and analyze huge amount of data,
	 designing and developing algorithms for data patterns recognition – data mining,
	 integrating machine learning patterns in data processing,
	 optimizing applications to shorten processing time,
Examplen (projecto	 ProbeWMS - a Web Map Service for render statistical representation of GPS data,
Exemplary projects	 application providing data for IQ Routes technology,
	 developing database for geometrical multi-layer data and metadata
Employer	UniCredit Global Information Services
Position	Web Developer (role: Analyst Programmer) (JAVA)
Period	9.2007 – 9.2009
Vocational Duties	 advising developers with lower roles and sharing knowledge,
	 reporting possible risks of tasks realization, guarding the time and correct path of tasks
	realization,
	 maintaining and developing B2E intranet portal for 120 000 employees of the group, developing intranet/internet web convises in international team and according to
	 developing intranet/internet web services in international team and according to specification,
	 managing team of three developers,
Exemplary projects	 application for publishing news for all companies in holding, managing work of three
	person team and external consultant,
	 application supporting VoIP technology project,
	 application for automatic generation of surveys and results presentation, debugging and supervision on statistics system for intranet portal with 120 000 users
	 debugging and supervision on statistics system for intranet portal with 120.000 users, desktop application for improving process of preparing reports for managers about portal
	accesses,
	 proposal and creation (teamwork) of knowledge data base for developers.
Employer:	AMG.net
Position:	Developer (JAVA)
Period:	3.2006 - 8.2007
Vocational Duties:	 programming web services and internet applications supervision of trainee work
Exemplary projects:	 web services for promotions and multi-page forms, creation of dynamic components
	(DHTML) for web pages, creation of prototype of the web page compliant with XHTML1.0
	for Bank Millennium, B2B o commorce for Orange
	 B2B e-commerce for Orange, web service for BRE Bank,
	 web service for credit cards promotion for MultiBank,
	 intranet web service for bank Pekao SA
