Liquibase and the CI/CD Process

✓ Oracle ACE Pro ✓ Oracle APEX & PL/SQL Developer ✓
Maintenance Team Leader ✓ Expert in database schema changes
control

Kielce Metropolitan Area

Podsumowanie

Success is not final, failure is not fatal: it is the courage to continue
that counts.

Winston Churchill.

Doświadczenie

Pretius Low-code

Oracle APEX & PL/SQL Developer | Maintenance Team Leader
styczeń 2022 - Present (2 lata 8 mies.)

- * Building and maintaining applications in Oracle APEX & PL/SQL.
- * Analyzing requirements, conducting client meetings, system evaluation, and estimation.
- * Working with multiple international clients across various industries including telecommunications, energy, logistics, transportation, finance, and dairy.
- * Implemented new or enhanced existing CI/CD processes in all mentioned client systems to ensure control over application deployment and database schema changes (GIT, Liquibase, Oracle SQLcl).

* Organizing maintenance team, ensuring the efficiency of existing client systems.

* Responding to reported issues according to agreed Service Level Agreements (SLA).

* Fixing errors reported by the client in production systems.

Oracle APEX | PL/SQL Developer

październik 2015 - grudzień 2019 (4 lata 3 mies.)

Kielce, woj. świętokrzyskie, Polska

My main goal was to simplify and ease officials' work in government administration with high-quality software

I have successfully projected, developed and tested:

★ financial-accounting system:

- ☛ entering of government budget plan was automated,
- ☛ many of administrative proceedings were simplified,
- ☛ several dozens of financial reports requested by the Supreme Audit Office were successfully created,

★ contract management system (based on the government budget):

- ☛ the number of clients using software increased by 70%,
- ☛ number of functionalities increased by 100%,
- ☛ many SQL queries were optimized so the performance of many app pages improved rapidly,

★ internal welfare and loan system:

- ☛ effective ETL migration to new financial software,
- ☛ proceeding time of granting social benefits and loans speeded up several times,

★ reporting software (customized statistical data for managers):

- ☛ financial data became available to 10 times more users without the significant increase in costs

I have also provided dozens of end-users training and implementations (up to 100 people at once)

and have held many meetings with clients (business analysis, requirements).

Technology used, skills: Oracle Database, ETL, PL/SQL, SQL, Big Data, Data Warehouse, Oracle APEX, CSS, HTML, JavaScript, Oracle Forms, GIT

CYFROWY POLSAT

6 lat 10 mies.

Billing Software Test Engineer / Test Coordinator

grudzień 2011 - wrzesień 2015 (3 lata 10 mies.)

Warsaw

★ I was a member of a team which has successfully developed and implemented projects, e.g. Smart Dom and Cyfrowy Polsat Go (Video on demand).

I was responsible for:

- creating T-SQL procedures for automated testing of financial data correctness,
- validating data according to International Financial Reporting Standards,
- preparing test cases,
- test management of billing components,
- XML interfaces validations,
- configuration of MSSQL Server test databases,
- fixing some bugs reported by business testers

Technology, skills: Scrum, T-SQL, SQL Server, JIRA, SoapUI, XML.

Quality Assurance and Supervisor at Call Center

marzec 2010 - grudzień 2011 (1 rok 10 mies.)

Warsaw

★ The quality of individual customer service voice calls improved by 90%.

To manage this:

- I have monitored, reported and analyzed random incoming voice calls,
- I have provided training and feedbacks to call center consultants (15-20 people, the group changed monthly)

I have also considered a client's complaints to call center customer service.

Technology, skills: CRM, NICE, Quality assurance

Call center customer service

grudzień 2008 - marzec 2010 (1 rok 4 mies.)

Warsaw

Keeping a positive image of the company.

Providing the best quality incoming voice calls with customers
