

Senior BI/DW Engineer

Summary of Qualifications

I am end to end developer with 9 years of professional experience in ETL/DWH/BI development. My practical knowledge was built in biggest Swiss banks where I was responsible for fast, consistent and reliable data warehouses and visualizations based on them. I participated in requirements gathering, documenting, testing and deploying changes I made.

I have a good knowledge in the area of relational databases, data modelling and processing. I also have working experience of Agile Scrum methodology.

I am good team player with strong self-motivation and good communication skills. I am open for learning new technologies, gaining experience from others and sharing my knowledge.

I love meeting new people, spending time outside and doing sports (gym & football especially – I am Real Madrid supporter).

Skills

Programming Languages/ Technologies

- PL/SQL
- UML
- Technical Documentation
- Java SE
- XML, JSON
- Shell scripting basics (ksh, bash)
- Python basics

RDBMS/ETL/BI

- Oracle
- MS SQL Server
- Business Intelligence
- Informatica PowerCenter
- QlikSense/QlikView
- Tableau
- OBIEE
- SAP Business Objects
- MS Access
- Control-M
- Autosys
- AWS basics

Methodologies

- Agile, SCRUM, XP
- Pair Programming
- Test Driven
- Waterfall

Development Tools

- Eclipse
- Visual Studio Code
- PL/SQL Developer
- Toad

Testing Tools

- FitNesse

Operating Systems

- Microsoft Windows
- Unix/Linux

Experience	
	BI Team in Aptiv
Project Description:	Building BI solutions from scratches. Reporting tool for teams' performance tracking, time management and gap analysis.
Customer:	Aptiv
Involvement Duration:	04.2020 - Present
Project Role:	Senior ETL/BI Developer & Scrum Master
Responsibilities:	<ul style="list-style-type: none"> ▪ Development of ETL processing ▪ Gathering requirements & system modeling ▪ Building dashboards in QlikSense ▪ Playing a Scrum Master role in Scrum Team
Project Team Size:	10-12 team members
Tools & Technologies:	QlikSense, Informatica PowerCenter, Plastic SCM, Jira, Scrum, AWS, Python
	Workforce Management Tool & Facility Cost Analysis Tool
Project Description:	Building Data Warehouse and visualization for actual vs forecasted costs for employees in departments and locations. Creating Data Warehouse for internal company costs (e.g. money transferred to vendors, costs of coffee, services, printers, etc.)
Customer:	Credit Suisse
Involvement Duration:	04.2018-03.2020
Project Role:	Senior DWH/ETL/BI Developer
Responsibilities:	<ul style="list-style-type: none"> ▪ Development of ETL processing ▪ System modeling ▪ Building dashboards in Tableau and OBIEE
Project Team Size:	4-5 team members
Tools & Technologies:	MS SQL Server, Tableau, OBIEE, Scrum, Jira, SVN
	Reporting for transaction correctness
Project Description:	Processing data sourced from XML files containing information from global transaction repositories.
Customer:	UBS
Involvement Duration:	08.2016-03.2018
Project Role:	DWH/BI/ETL Developer (Authorized Officer)
Responsibilities:	<ul style="list-style-type: none"> ▪ Development of ETL processing ▪ System modeling ▪ Development of file input-output system for data warehouse ▪ Building Data Mart reports ▪ Functional testing ▪ Legacy code maintenance
Project Team Size:	6-7 team members
Tools & Technologies:	Oracle, PL/SQL, QlikView, SAP Business Objects, Fitness, ksh, Autosys, SVN
