Process Automation Manager | Business Analysis | Empowering world with robots

Serbia

Summary

- Passionate IT and Business Strategist eager to empower the world with software robots with 6+ years of professional experience in Robotic Process Automation. I see robots taking over any work that robots can do making the work more human. From that perspective my main goal is to learn more about robotics and business side of it and how it can impact and empower our world by spreading the importance of it around the world!
- Expertise: Process Automation, Business Analysis, Business Negotiation, Presentation Skills, Robotics
- Tools: Python, UiPath Certified Advanced RPA Developer (UiARD), Lean Six Sigma - Green Belt, SAP, Automation Anywhere, Power Automate, Win Automation, Softmotive, Contextor, Selenium, Git;
