

Curriculum Vitae

Job Target

Job in .NET technology, with high quality code.

Education

- | | |
|------------|--|
| 2009- 2013 | Computer science at University of Gdansk ,faculty of mathematics, physics and informatics , Bachelor's degree. |
| 2005-2009 | Trade School in Sopot , in IT Technician class. |

Experience

- | | |
|----------------------|---|
| 2021.10 – 2023.01.31 | Okeva LTD London (Remote) Senior Software developer
Senior Software developer – Application for financial industry. This project was a viewer of all messages that was within this bank. I was responsible for gathering information from the business, making diagrams with proposals and after that I had to implement it.
The main functionality is finished, and for now the management decided not to add any new features, so they decided to keep only one person and lay off the rest of the consultants. Technologies used C# IBM MQ, Microservices, MSSQL, Nunit. |
| 2021.04 – 2021.09.30 | Trimetis AG (Remote)
Senior Software developer – Application for the flight industry. This application gathered all signals from the airport, and it was allowing traffic air control tower and its operators to react if something suspicious had happened. I was responsible for reporting part of it. I had to gather all needed information from the business using EventSourcing technique from DDD, implement it and present architecture to the team.
I was hired only for certain parts of the system.
Technologies used C# .net core 3.1, dapper, MSSQL. |
| 2021.01 – 2021.03.31 | Devire sp. z o.o (Remote)
Senior Software developer – Application for healthcare industry. It was a solution that was allowed to gather information about patients and make the ability to view them in browser, edit it and make reports.
I was hired only for this project, I asked the manager if they had another project, and they didn't.
Technologies used CQRS, .net core 3.1, angular 10, Typescript. |

2020.05 – 2020.10

Rocksoft (Remote)

Senior Software developer – Application for church in Norway. It was a very interesting project because I had to make MVP with completely new backend architecture and present it to the team.

I was hired as a consultant to do only this.

Used technologies CQRS C# .net core 2.1, react, Typescript, DDD, JavaScript, entity framework core, microservices.

2019.08 - 2020.05

Itsg global sp.z oo (Remote)

Senior Software developer – It was a sales planning application for the **bank branch**, where you could plan sales from the top of the organization down to a specific salesperson. There were also modules that generated reports and paid bonuses to employees and bank branches based on the data from the sales planning. I was responsible for gathering information about the process using EventStorming, besides that I need to integrate my new solution with existing legacy application.

Used technologies, CQRS C# .net core 2.1, DDD, jQuery JavaScript, entity framework core, microservices.

2019.04 - 2019.08

Seargin sp.z oo
